SE LAB 2 REPORT

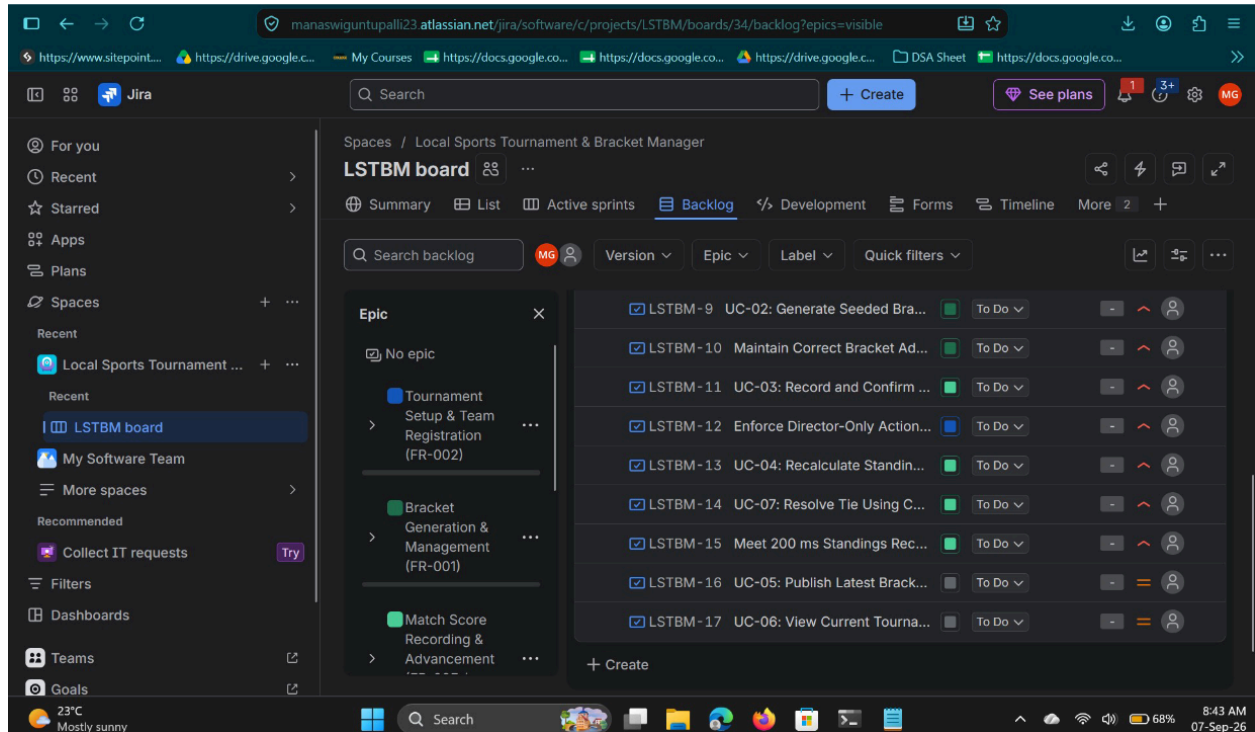

Lab 2: Agile Backlog Creation & Sprint Simulation in Jira

PROBLEM STATEMENT #54 | Media, Events & Community

Local Sports Tournament & Bracket Manager

EPICS

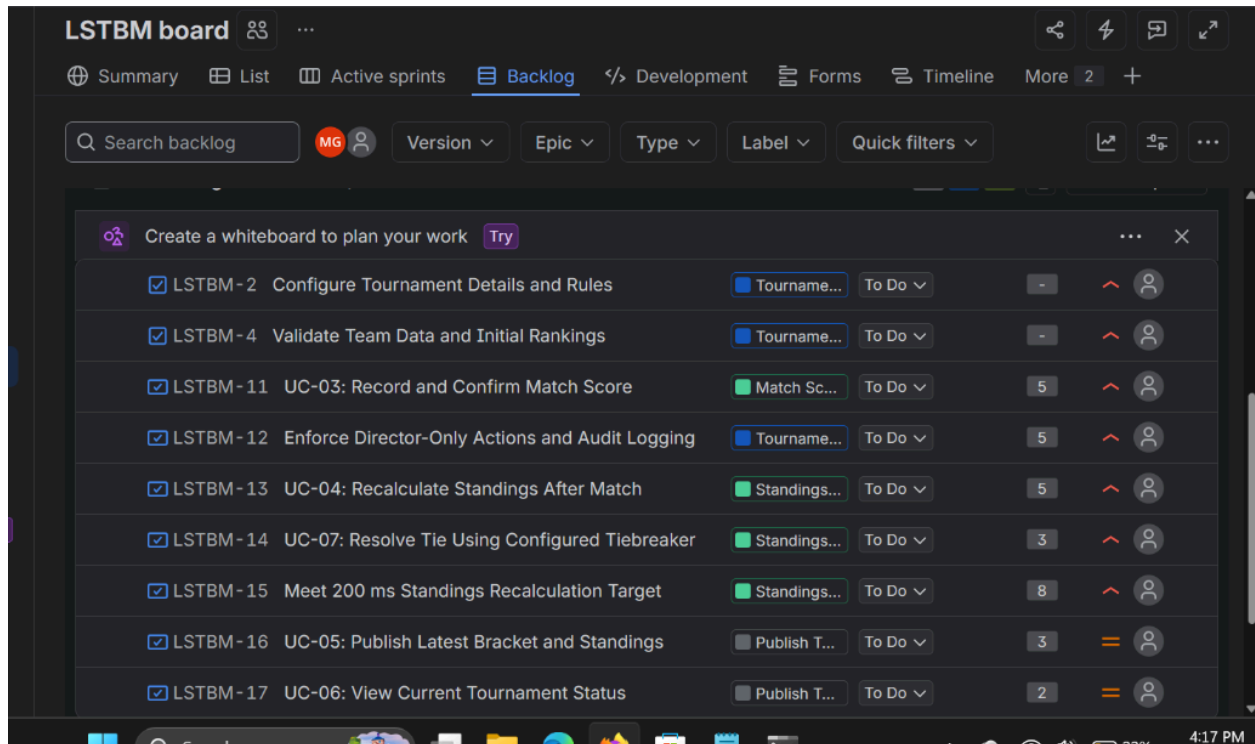

Epic	Mapped Requirement	Priority
Tournament Setup & Team Registration	FR-002	High
Bracket Generation & Management	FR-001	High
Match Score Recording & Advancement	FR-003 / UC-03	High
Standings, Tiebreakers & Performance	FR-004 / NFR-001	High
Publish Tournament Status & Results	FR-005	Medium

Jira backlog with the Epic panel and related backlog items

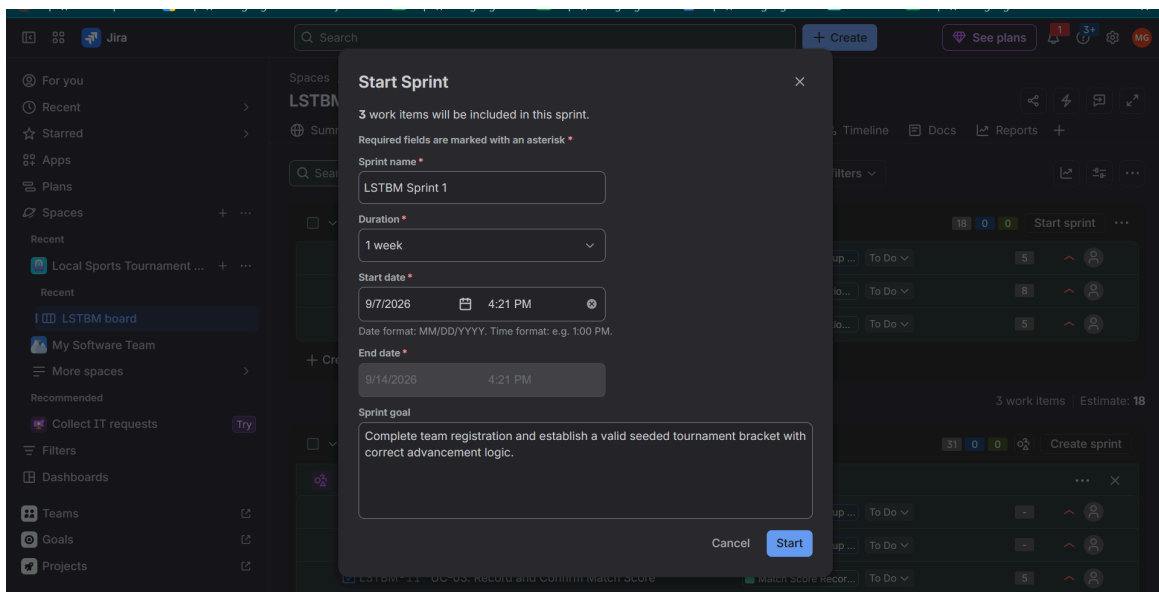

User Stories, Priorities and Story Points

Key	User Story	SP
LSTBM-3	UC-01: Register Team	5
LSTBM-9	UC-02: Generate Seeded Bracket	8
LSTBM-10	Maintain Correct Bracket Advancement	5
LSTBM-11	UC-03: Record and Confirm Match Score	5
LSTBM-12	Enforce Director-Only Actions and Audit Logging	5
LSTBM-13	UC-04: Recalculate Standings After Match	5
LSTBM-14	UC-07: Resolve Tie Using Configured Tiebreaker	3
LSTBM-15	Meet 200 ms Standings Recalculation Target	8
LSTBM-16	UC-05: Publish Latest Bracket and Standings	3
LSTBM-17	UC-06: View Current Tournament Status	2

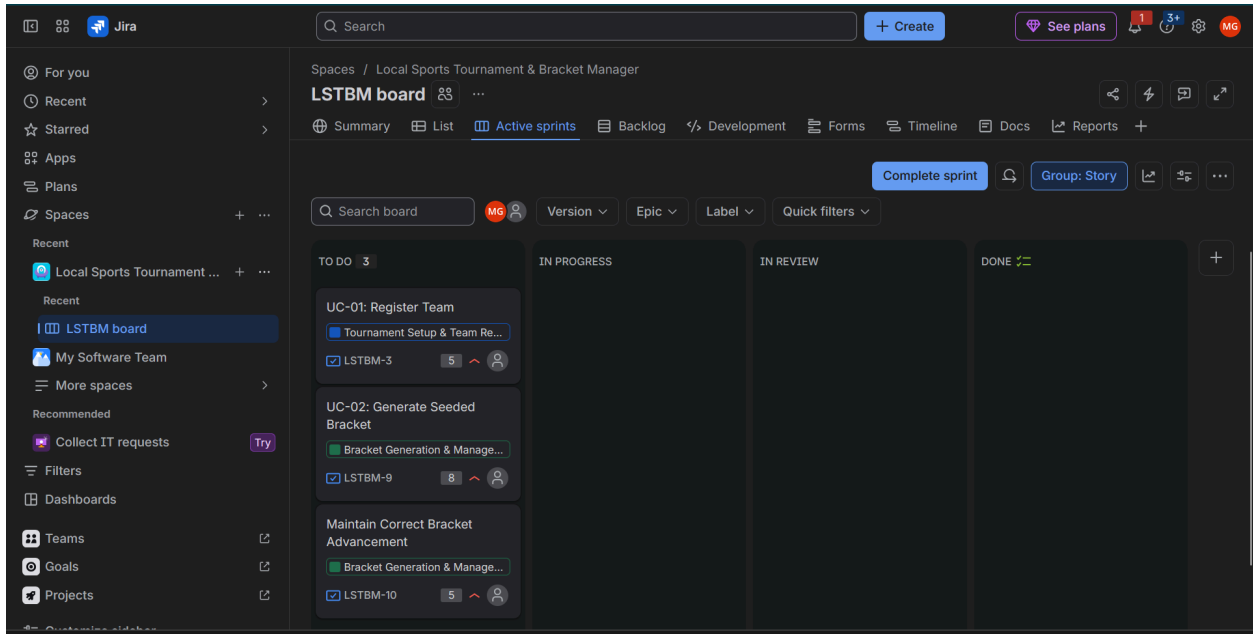

Backlog view showing Story Point assignments for the User Stories Sprint 1

Sprint 1 User Story	SP
UC-01: Register Team	5
UC-02: Generate Seeded Bracket	8
Maintain Correct Bracket Advancement	5

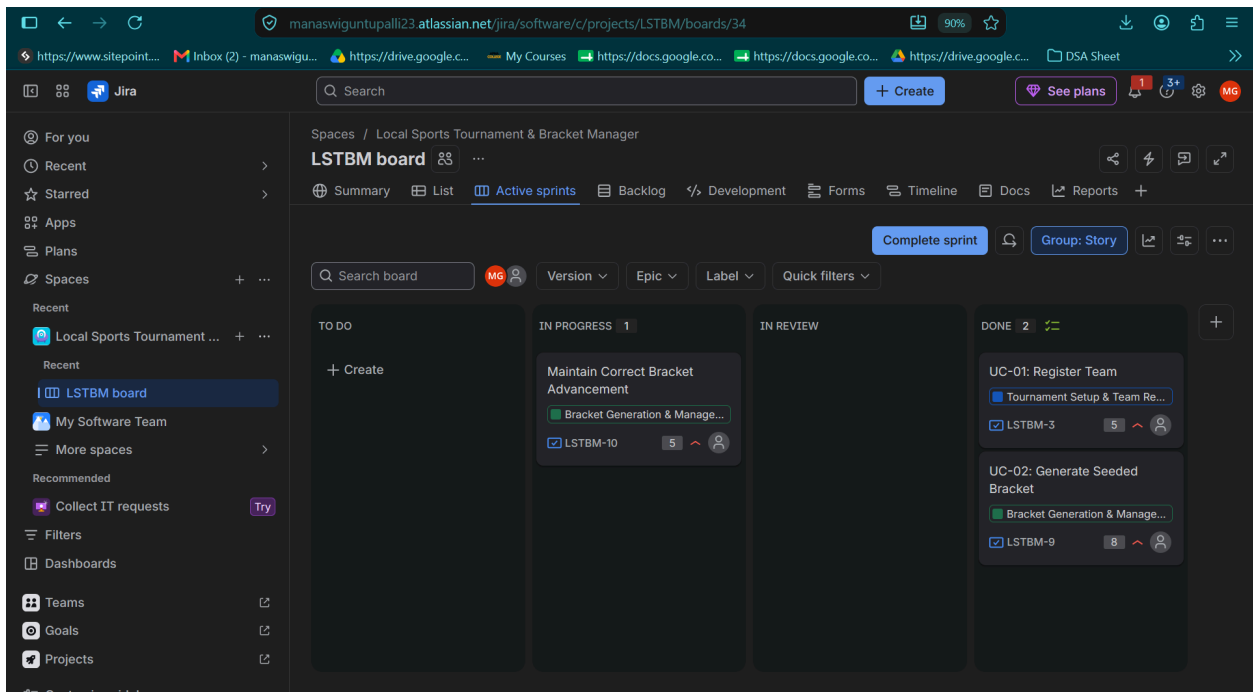

Sprint 1 setup showing one-week duration and sprint goal

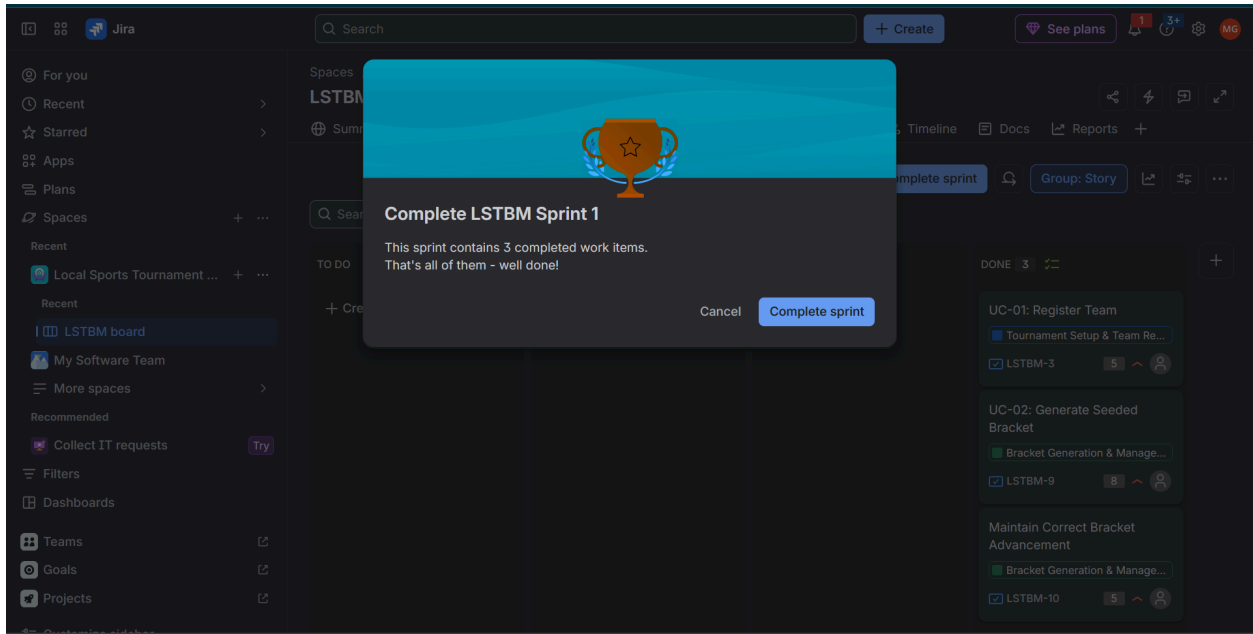

Sprint 1 Active Sprint view at the start, with all stories in To Do

Sprint 1 Progress

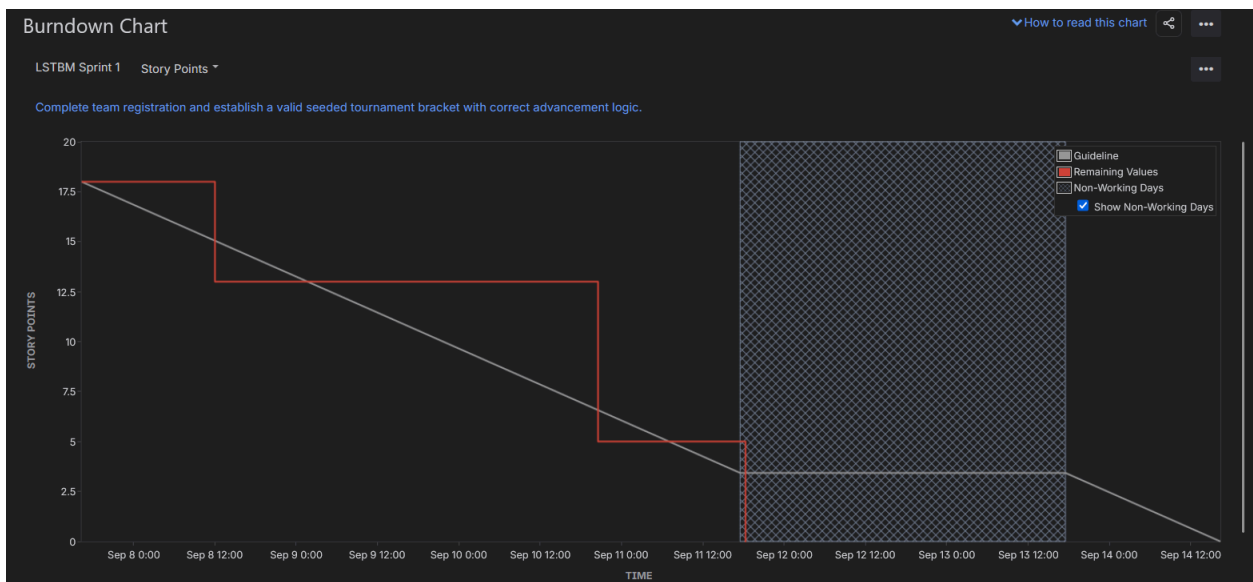

Sprint 1 during execution, showing completed work and the remaining story in progress

Sprint 1 completion confirmation with all three work items completed

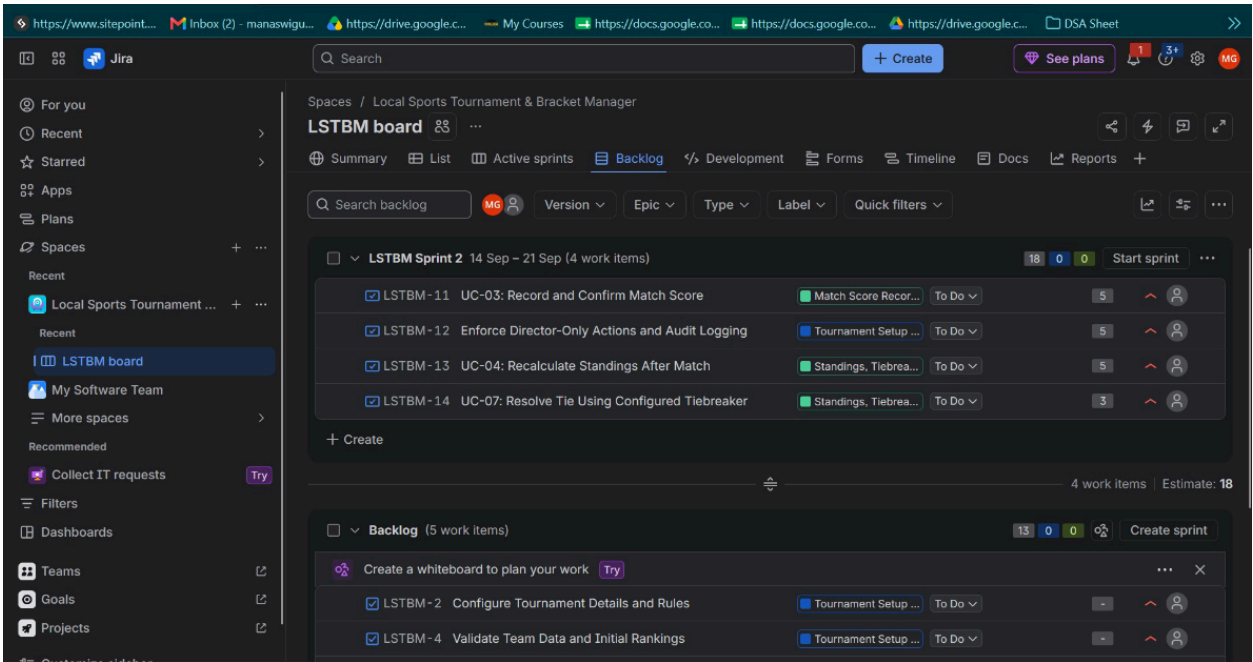

Sprint 1 Burndown

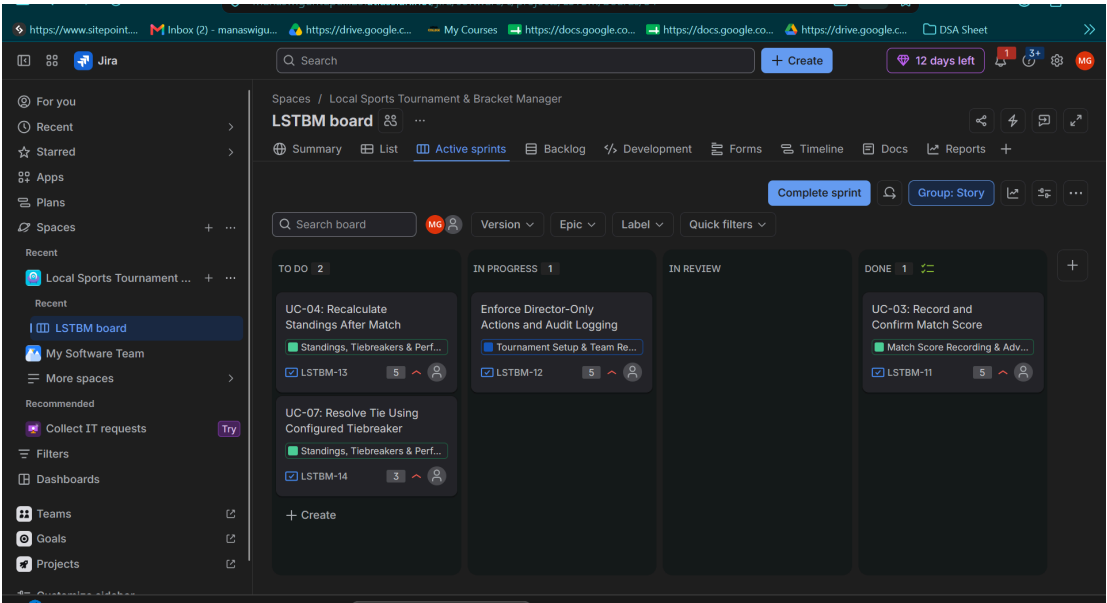

Sprint 1 Burndown Chart using Story Points

Sprint 2

Sprint 2 User Story	SP
UC-03: Record and Confirm Match Score	5
Enforce Director-Only Actions and Audit Logging	5
UC-04: Recalculate Standings After Match	5
UC-07: Resolve Tie Using Configured Tiebreaker	3

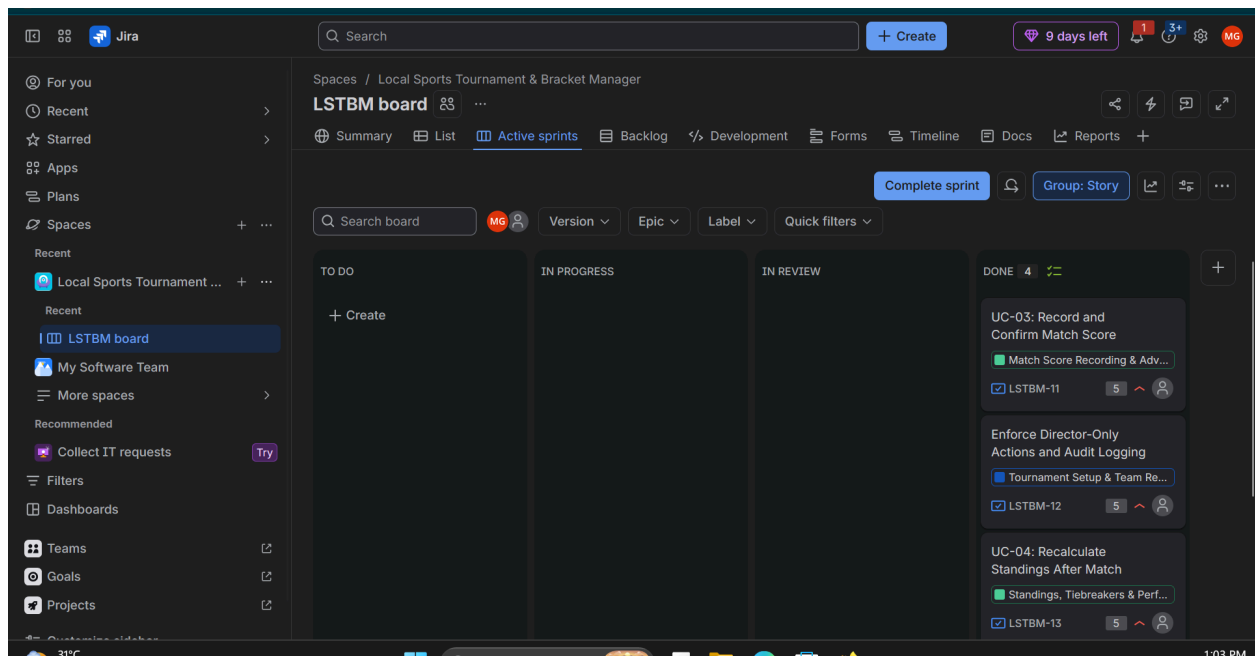

Sprint 2 planned with four User Stories and an 18-point estimate

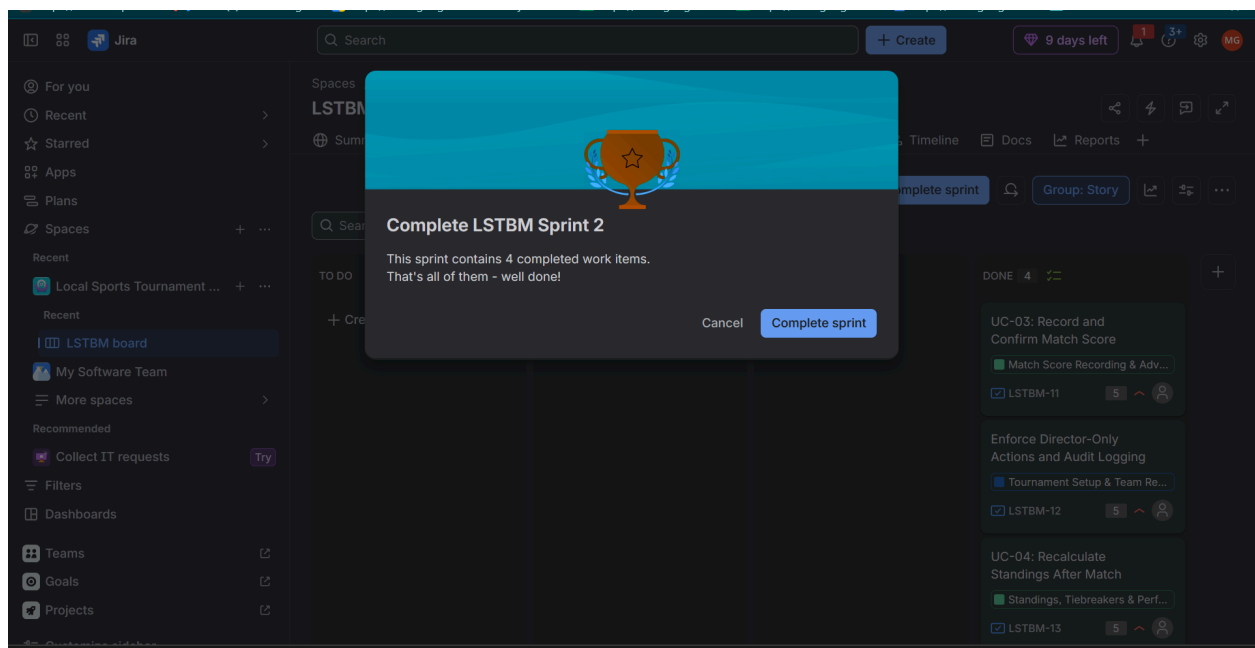

Sprint 2 progress showing one story completed and one story in progress

Sprint 2 Progress and Completion

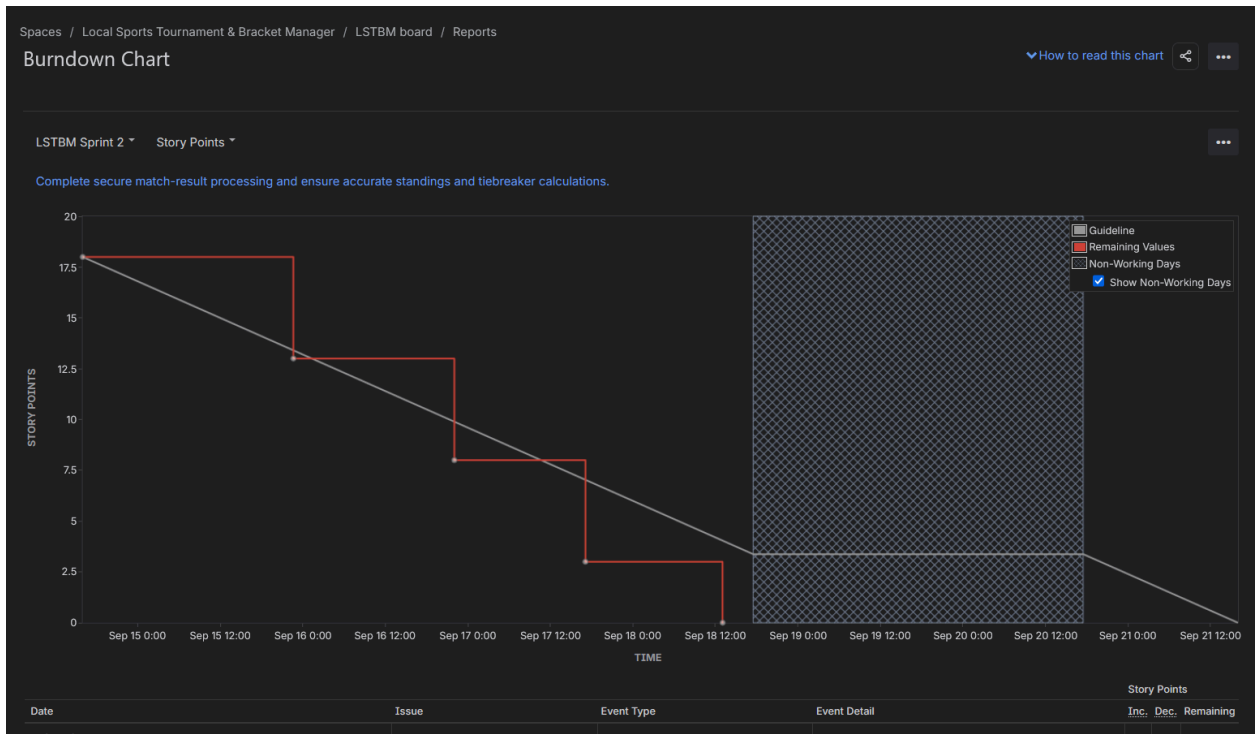

Sprint 2 completion state showing all four committed User Stories moved to Done

Sprint 2 completion confirmation with all four user stories completed

Sprint 2 Burndown

Sprint 2 Burndown Chart

Reflection Questions

1. Did your estimations reflect the actual effort?

Yes. The Story Points were reasonable for the relative complexity of the work. The 5-point stories represented moderate effort, while the more complex bracket-generation work was estimated at 8 points.

2. Was your backlog well-prioritized?

Yes. The backlog followed the logical tournament workflow: team registration and bracket generation came first, followed by score recording, standings calculation, and tiebreaker handling. Publishing and performance-related stories were kept for later iterations.

3. How did your simulated sprint align with your plan?

The simulation followed the plan well. Both Sprint 1 and Sprint 2 committed to 18 Story Points, and all committed stories were completed by moving them gradually from To Do → In Progress → Done.

4. What insights did the burndown chart give about your team's capacity?

The burndown charts showed steady progress and reached 0 remaining Story Points before the planned sprint end. This indicated that an 18-point sprint was manageable in the simulation, while the step-wise drops showed that work was completed in stages rather than all at once.
